

STARLINE

Raising the Bar for Flexible Power

A Legacy of Power Distribution.

Universal Electric Corporation (UEC), the manufacturer of Starline, is built on over 90 years of innovation in delivering safe and flexible power to a variety of industries, businesses and institutions. Expertly designed as a simple, versatile, fast and economical solution for supplying power, our products are unique because they can be tapped instantly at any location. Plus they can dramatically reduce downtime, as well as costs for expansion and new locations, while providing ongoing customization and flexibility in power distribution. And UEC excels at collaborating with design engineers to provide solutions for any application, and for any industry.

UEC's Starline Track Busway, Starline Plug-In Raceway and Starline Critical Power Monitor are the industry standard for flexible power in mission critical, data center, university, lab, industrial and retail environments. Time, money, and labor savings have made us the power distribution supplier of choice for businesses that recognize that Starline's products are in a class by themselves.

STARLINE Track Busway

Distributing power. Removing limitations.

We've built a better way to provide power to any mission critical, industrial, retail or lab environment. With Starline Track Busway, easy installation means faster expansions and additions, plus lower cost of ownership. Our flexible and scalable busway system allows you to relocate power anywhere you need it, and at anytime without shutting down power.

The unique, turn-n-lock connection method used for the plug-in units is the key to our busway's reliability. By inserting the plug head anywhere along the busway and rotating it 90 degrees, you get a constant, locked in, reliable connection – eliminating power interruptions caused by overheating or loss of connections.

STARLINE
TRACK BUSWAY

FEATURES

Reduced Facility Construction Costs

- Labor savings mean installation is less expensive
- Eliminates costly changes and outside labor costs for electrical specialists
- Lower cost of ownership

Faster Installation

- Building projects are up and running faster
- Add, remove or relocate power easily and quickly with no downtime

Flexibility for the Future

- Plug-in units can be disconnected and connected without de-energizing the busway
- Requires no routine maintenance
- Faster and less costly expansion or remodeling

Environmentally Friendly

- Less installation materials
- Busway and outlets are reusable and relocatable

More Choices

- Scalable and customizable lengths, sizes and configurations to meet your unique specifications
- A variety of plug-in units and Starline's monitoring capabilities make us the preferred choice of data centers and mission critical facilities

APPLICATIONS

Data Centers/Mission Critical

By their name and nature, mission critical facilities can't afford costly downtimes when expansion is needed. This makes Starline an ideal choice for their power needs.

Retail

Whether for a new store or simplifying the power distribution for an existing one, Starline has years of experience providing power for the fast-moving retail environment. And Starline allows for lighting and power to be connected in the same housing.

Industrial

Auto, high-tech assembly, and contract manufacturing companies demand a power distribution system capable of providing high density plug-in availability, as well as a system that allows them to meet customer production needs.

Universities and Labs

Flexibility, adaptability, lower costs and sustainability are just a few reasons why Starline is the preferred power choice for universities and labs.

BUSWAY SYSTEMS

Our most popular, powerful and productive systems feature 250, 400, 600, 800, and 1200 amp options for power. And most importantly, our plug-in units can fit any of these busways so that your investment is protected as your power needs change.

System No.	Amp	Volts (MAX)	Neutral	ISO GRD	Size
40T1	40A	480	100%	NO	1.66" x 1.62" (42mm x 41mm)
50T1	50A	480	100%	NO	1.66" x 1.62" (42mm x 41mm)

Starline Track Busway is the simple, versatile, fast and economical solution for supplying power to electrical loads. And our cutting-edge engineering gives you the unique ability to instantly tap into the busway at any location, with a variety of plug-in units.

C = Copper
H = Hybrid (Copper Contact)
4 = 3 phase plus neutral
N = 3 phase plus 200% neutral
G = 3 phase plus neutral plus internal ground conductor
F = 3 phase plus 200% neutral plus internal ground conductor

*600V must be specified

STARLINE Plug-In Raceway

Next generation raceway for today's power needs.

Starline Plug-In Raceway was created to meet the ever-changing power distribution and datacom needs of healthcare, education, industrial, data center and retail applications.

Though it may look like other raceway products, Starline Plug-In Raceway has the fastest install times in the industry. It also has the unique ability to add or relocate plug-in modules anywhere on the raceway quickly and easily, even after installation.

When changing or repositioning power receptacles, you simply snap the pre-assembled plug-in modules into place on the raceway backplane. The connection to power is made automatically without having to interrupt power.

STARLINE
PLUG-IN RACEWAY

FEATURES

Safe fingerproof design allows end users to add plug-in modules without cutting power

Low installation costs due to its patented prewired bus-type raceway design

Flexible design allows receptacle plug-in modules to be added or relocated anywhere on the raceway quickly and easily

Breaker and non-breaker single phase and three phase plug-in modules (up to 30 amps)

Power feeds, elbows, and metering options available

Datacom channel for data, video and audio applications available

Custom color and finishes available

APPLICATIONS

Science & Technology

Ideal for hospitals, pharmacies, and research and development. Designed to provide flexibility and reliability, the raceway helps facilities run at full efficiency.

Education

For use in next generation classrooms, labs, research, science and engineering spaces.

Data Center

For higher density server cabinets, multiple types of receptacles and future flexibility.

Industrial

Efficient and economical solution for supplying power and expanding operations quickly.

Retail

Ideal in fitness and fast-paced retail environments using modules that are easy to install and no electrician needed to add power.

POWER ONLY

Starline Plug-In Raceway Power Only system provides flexible modular power for surfaces. Rated at 20 or 60 amps per phase, and voltages up to 480V. Move or add plug-in modules at any time – without turning off power.

POWER AND DATA

Starline Plug-In Raceway Power and Data system provides power and an additional cavity to pull data and fiber cables through. Custom designed covers can assist in making installations faster and easier.

CABINET BUSWAY SERIES

Cabinet Busway is a preassembled system ideal for server cabinets and industrial workbench applications. By utilizing the Plug-In Raceway components, it becomes an ideal configuration for applications that require higher power density, multiple types of receptacles, and future flexibility.

PLUG-IN MODULES

Plug-in Modules are universal for all of the Plug-In Raceway systems above. Modules can be easily moved or added to any of these systems, and receptacle combinations can be mixed and matched to create the most efficient design possible.

STARLINE Critical Power Monitor

Real Time Monitoring for Peak Efficiency.

With the market's growing need for energy efficiency, energy monitoring systems are more important than ever. The Starline Critical Power Monitor (CPM) offers an enhanced monitoring package that will allow you to monitor, integrate and display more power information easily and reliably.

The Starline CPM creates value for power distribution systems by providing the critical information needed to optimize management and efficiency.

STARLINE
CRITICAL POWER MONITOR

FEATURES

- Revenue grade metering functionality
- Monitoring of multi-circuit configurations
- End feed and branch circuit models
- Display and non-display versions
- Standard integral web pages to easily configure meter attributes and view data
- Wired Ethernet and serial communications are standard, optional 802.11n Wi-Fi connectivity
- Ability to use both Serial and Ethernet protocols simultaneously
- Telnet, SNMP, Modbus TCP/IP, BACnet TCP, http/https and Modbus RTU are also standard protocols
- Available with daisy-chain Ethernet
- Uniquely designed to provide the functionality required for monitoring any facility's power use
- Optional temperature monitoring
- Both Vac and DC versions available

APPLICATIONS

Data Centers/Mission Critical

Starline CPM provides actionable energy management information for mission critical environments.

Industrial

Due to its application-specific configurations, Starline CPM enables customized power monitoring solutions required to maximize efficiency.

Submetering

Whether new installation or retrofit, Starline CPM provides revenue grade metering functionality to support a wide range of circuit configurations and ratings.

PRODUCTS

Track Busway CPM

Designed to provide the functionality required for both end feed and branch circuit applications.

Standalone CPM

Mounts easily to electrical panels and enclosures using a standard knockout.

Starline Critical Power Monitor is calibrated to meet ANSI Revenue Grade Standards for power usage, and a variety of communications interfaces facilitate seamless integration with BMS and DCIM packages. Monitors are factory-built into Starline power feeds and plug-ins, providing a clean and seamless integration of monitoring with power distribution.

CORDED CPM

The Corded CPM comes with a plug on one end and a connector body or receptacle on the other end.

Ideal for field power monitoring on-the-fly. It is capable of monitoring the energy of any device.

Available with

- Two different box sizes with various single and three phase configurations
- The latest Starline CPM meter features and accessories
- Varying lengths of cord both above and below the meter

CPM TEMPERATURE MONITOR

Compatible with 225, 250, 400, 600, 800 & 1200 amp Starline Track Busway systems

Eliminates need to periodically IR scan

Provides end feed temperature data in real time (4 lugs and internal enclosure temperature)

Data available for end user analysis via webpage

RETROFIT CPM

The Retrofit CPM allows non-metered legacy devices to be upgraded in the field to include metering functionality.

It is compatible with Starline Track Busway Plug-in Units, and other manufacturer's devices as well.

Available with

- Different style boxes dependent on where you would like it attached to your device
- The latest Starline CPM meter features and accessories
- Optional factory-completed rework if desired

STARLINE Field Services

Discover the Power of Field Services.

With over 30 years of experience in the busway market, Starline has the knowledge and expertise to ensure that your Track Busway system is functioning at a best-in-class level. Our trained and authorized factory representatives will provide unmatched on-site services whenever you need them.

UNIVERSAL
GLOBAL SERVICES

LOADBANK TESTING AND EQUIPMENT RENTALS

Factory trained and certified technicians will load bank test and commission Busway system to client's specifications

Reliable source for load bank rental equipment delivered to site when you need it

METER SERVICES

Certified technicians will safely and efficiently program meters

Technicians can integrate your CPM devices so that you can focus on operational goals

Real-time data delivers the analytics to make better operational decisions

STARTUP AND SYSTEM CERTIFICATION

The system certification process helps mitigate issues and risks associated with startup by proactively inspecting, testing and reporting on Starline products

Our on-site technicians will rely on proven best practices and operational compliance standards to help meet your commissioning deadlines

Upon successful completion of system startup, Starline's standard manufacturer's warranty will be automatically extended in duration

ENGINEERING STUDIES (US ONLY)

Engineering Studies allow for compliance to safety standards

Engineers will provide facility electrical studies, recommend corrective actions or confirm your systems reliability and compliance with government and safety requirements

ON-SITE INSTALLATION SUPPORT

Confirm equipment delivery and quality

Contractor training on best practices for installation

Visual inspection of proper system installation

Expedited part replacement (if required)

ON-SITE PRODUCT TRAINING

Classroom and hands-on Busway training

Proven course curriculum is thorough and effective meeting Starline's rigorous installation and operational standards

Improve operator safety and learn best practices to care for your product

Ongoing Support Plans

Choice of Extended Warranty or Enhanced: Silver, Gold or Platinum Service Plans	Extended 1, 2, 3, 4 years	Silver 1, 2, 3, 4 years	Gold 1, 2, 3, 4 years	Platinum 2, 3, 4 years
Repair or replacement of defective parts throughout life of service agreement	x	x	x	x

Spare parts inventory management program				x

Universal Global Services

offers ongoing support plans so you can get the most out of your Starline Track Busway system. Enjoy peace of mind with a customizable plan to fit your company's needs.

Universal Electric Corporation (UEC), the manufacturer of Starline, has been a leader in power distribution since 1924. The company's founders led the way for many new technologies in the power distribution equipment industry. Today, this family tradition of innovation continues to pave the way for safer, more innovative and more reliable electrical power distribution systems. Visit www.StarlinePower.com for your flexible power solutions.
